ABID ARHAM

Dhaka, Bangladesh | (+88) 01751921343 | mix.arham@gmail.com | github.com/abid-arham

SUMMARY

Final-year CSE student at AIUB (CGPA 3.78, graduating April 2027) who builds full-stack web applications with Next.js, React, Node.js, Express, PostgreSQL, and MongoDB. Delivered a client e-commerce store to production. Comfortable across frontend and backend, building REST APIs, and debugging authentication and caching issues. Applying for the Intern Software Developer role.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Redux Toolkit, Next.js, Tailwind CSS
Backend: Node.js, Express, PHP, REST APIs, JWT and Passport authentication, RBAC, Prisma ORM, Mongoose
Databases: SQL (PostgreSQL, MySQL), MongoDB
Tools: Git, GitHub, Docker, Postman, Vercel, Render
Fundamentals: Data structures and algorithms, problem solving in C++, Java, OOP, design patterns

PROJECTS

White.H: Clothing and Beauty E-Commerce Store *React, Redux Toolkit, Express, TypeScript, MongoDB*
Live: client-orcin-alpha-86.vercel.app

- Client project, live in production. Built a full-stack store for a Bangladeshi clothing and beauty brand: a React (Vite, responsive Tailwind layouts, Redux Toolkit with RTK Query) frontend on Vercel, an Express and TypeScript REST API on Render, and MongoDB Atlas.
- Designed a manual bKash/Nagad payment flow: customers submit a transaction ID, admins approve or reject from a verification queue, fulfillment is blocked until payment is verified, and orders whose transaction ID already appears on a verified order are flagged. Email alerts go through Resend.
- Secured the API with JWT access and refresh tokens, bcrypt hashing, role-based admin routes, Zod request validation, Helmet, rate-limited auth endpoints, and a centralized error handler.
- Built the admin panel: dashboard stats via MongoDB aggregation, product and category CRUD with Cloudinary image uploads, paginated order search and filters, and store settings. Containerized the API with a multi-stage Dockerfile.

(GitHub repository is private — client work)

FixItNow: Home-Services Marketplace *Next.js, Express, TypeScript, Prisma, PostgreSQL*
Live: assignment-5-alpha-brown.vercel.app | github.com/abid-arham/FixItNow

- Built a full-stack marketplace with a Next.js frontend and an Express/Prisma/PostgreSQL REST API, deployed independently on Vercel.
- Modeled technicians, categories, bookings, payments, and reviews; wrote idempotent seed scripts for repeatable local setup.
- Fixed an auth middleware bug, a per-user response-caching bug, and Next.js prerendering errors from Suspense boundary violations.

Wanderlust: Travel Listing App *Node.js, Express, MongoDB, EJS, Passport*
Live: wanderlust-oa2t.onrender.com | github.com/abid-arham/Wanderlust

- Built an MVC app with Passport authentication, owner-only edit and delete middleware, Cloudinary uploads, and Mapbox maps.

NextCart: Multi-Vendor E-Commerce Platform *PHP, MySQL, Git*
Code: github.com/abid-arham/Project-NextCart

- Built a 4-portal marketplace (customer, seller, delivery, admin) in PHP and MySQL; owned the admin portal.

DevPulse: Issue Tracker REST API *Node.js, TypeScript, PostgreSQL, JWT*
Code: github.com/abid-arham/devpulse

- Built a REST API with JWT auth, RBAC, and issue CRUD, using raw SQL under a no-ORM, no-JOIN constraint.

EDUCATION

American International University-Bangladesh (AIUB), Dhaka *Expected April 2027*
B.Sc. in Computer Science and Engineering. CGPA 3.78.
Relevant coursework: Software Architecture (creational and behavioral design patterns applied to database configuration and payment modules).
Square High School & College, Pabna: HSC 2021 (GPA 5.00), SSC 2019 (GPA 5.00)

EXPERIENCE

IT Support Specialist Trainee, SEIP (Pabna) *Sep 2022 - Dec 2022*

- Trained in computer assembly, MS Office, and hardware and software troubleshooting.

ACTIVITIES

- Participant, AIUB Programming Contest (Mar 2024): solved three problems in C++.
- Founding Member, Pabna Students Association (Aug 2020 - Jan 2021): helped organize a COVID-19 emergency relief program.
